Final trial results show GSK malaria vaccine's efficacy wanes over time - FierceVaccines

In a Phase III trial involving 15,000 children in Africa, early results showed that children who received three doses of GlaxoSmithKline's candidate malaria vaccine were half as likely to contract malaria infection in the year after vaccination.

Resisting Resistance: Are we headed for a post-antibiotics era?

According to the WHO, antibiotic resistance is a global problem which could lead to a post-antibiotics era, a future where resistance is so widespread that even common infections become un-treatable and are once again fatal. Resistant infections...
